July 2, 2010

The Honorable Lisa Jackson
Administrator
U.S. Environmental Protection Agency
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

Dear Administrator Jackson:

We are very concerned about the U.S. Environmental Protection Agency's (EPA) decision in the Prevention of Significant Deterioration (PSD) and Title V Greenhouse Gas Tailoring Rule to consider the emissions from biomass combustion the same as emissions from fossil fuels.

EPA's decision contradicts long-standing U.S. policy, as well as the agency's own proposed Tailoring Rule. Emissions from the combustion of biomass are not included in the Department of Energy's voluntary greenhouse gas (GHG) emissions reporting guidelines and neither are they required to be reported under EPA's GHG Reporting Rule. In the proposed Tailoring Rule, EPA proposed to calculate a source's GHG emissions based upon EPA's Inventory of U.S. GHG Emissions and Sinks. The GHG Inventory excludes biomass emissions.

We think you would agree that renewable biomass should play a more significant role in our nation's energy policy. Unfortunately, the Tailoring Rule is discouraging the responsible development and utilization of renewable biomass. It has already forced numerous biomass energy projects into limbo. We are also concerned that it will impose new, unnecessary regulations on the current use of biomass for energy.

We appreciate that EPA intends to seek further comments on how to address biomass emissions under the PSD and Title V programs. With this rule, the agency has made a fundamental change in policy with little explanation. We strongly encourage you to reconsider this decision and immediately begin the process of seeking comments on it. In addition, we appreciate Secretary of Agriculture Tom Vilsack's commitment to working with EPA on this issue and encourage you to utilize the expertise of the U.S. Department of Agriculture.

Please let us know as soon as possible the agency's plans on this matter. We appreciate your attention to this important issue.

Sincerely,

Blanch L. Linsch
