

## Appendix 2: Quick Reference Guide

Use the following checklist to determine if projects are likely to succeed:

### Step 1: Technology Screen

Is the project a wood to electricity project, a pellet project, or a project that uses another technology that is commercially viable today?

*If YES, then go to Step 2: Status Screen. If NO, stop – project fails the screen.*

### Step 2: Status Screen

Is the project operating?

*If YES, then the project passes the screen. If NO, go to question 2a.*

2a. Is the project under construction?

*If YES, then the project passes the screen. If NO, go to question 2b.*

2b. Does the project have two or more of the following?

- Secured site
- Financing
- Air permit
- Engineering Procurement and Construction (EPC) contract
- Power Purchase agreement or off-take agreement
- Public Service Commission approval
- Interconnection agreement
- Wood supply agreement

*If YES, the project passes the screen and demonstrates momentum towards initiating construction. If NO, then the project fails the screen and is not considered likely to succeed at this time given publicly-available information.*
